

# ESET Smart Security 4 Business Edition + ESET Remote Administrator

## Maintain the highest level of security across all of your networks

ESET Smart Security combines an advanced management console and award winning Threatsense engine with firewall and antispam. It's fast and thorough scanner stops even SSL-encrypted network and email-borne threats. ESET's advanced heuristics protect your endpoints from known and new threats so your users can focus on business. Our proactive protection is so strong it stops new threats before other products realise they exist. ESET Smart Security has proven power to protect your company's valuable data and reputation.

## Endpoint security management made easy

Ease of management is as critical as the effectiveness of your endpoint security solution. ESET Remote Administrator provides a comprehensive management console so you can control the entire network from one place – whether you support ten computers or thousands. ESET Remote Administrator has a small footprint and is highly scalable. It makes managing our security solutions simple for businesses of all sizes.

### KEY FEATURES

#### ESET Smart Security Business Edition

<b>Fully integrated protection</b>	ESET Smart Security integrates our powerful antivirus engine with state-of-the-art personal firewall and antispam modules – offering comprehensive protection to the work stations across your network.
<b>Extremely light system footprint</b>	ESET Smart Security is so light your users will not even notice it running.
<b>Advanced archive scanning</b>	Threats don't always enter where you expect. ESET Smart security can scan into layers of compressed files and ferret out malicious software. Users can control search depth, file size, archive size and timeout of archive scans.
<b>Encrypted communication control</b>	Scanning SSL-encrypted HTTP and POP3 protocols defeats even threats that hide from plain sight.
<b>Enhanced portable computer support</b>	Enhanced settings for portable computers allows tasks to be postponed when the computer is running on battery power.
<b>ESET SysRescue</b>	Creates rescue CDs, DVDs or USB drives for cleaning unstable, infected systems
<b>ESET SysInspector</b>	Integration administrators will love our advanced diagnostic tool for taking "deep-dive" snapshots of systems. Files and processes are colour coded in scan logs to make it easy for IT administrators to identify potential threats in the system.
<b>Uninstall password protection</b>	Password protection that prevents ESET Smart Security from being uninstalled by unauthorised employees or visitors.
<b>Extended email client support</b>	Password protection for Microsoft Outlook, Microsoft Outlook Express, Mozilla Thunderbird, Windows Live Mail and Windows Mail makes messaging security simple. POP3 and IMAP protocols support delivers the same protection to other email clients.
<b>ESET self defense and HIPS</b>	ESET Smart Security has built-in technology to prevent malicious software from corrupting or disabling it. Unauthorised attempts to modify your OS or applications are actively blocked through a combination of advanced behavioural analysis and network filtering that monitor your system processes, files and keys.
<b>Removable media access control</b>	Protects against infections from USB drives, floppies, CDs and DVDs.
<b>Improved cleaning</b>	Cleaning of certain difficult to remove infections has been significantly improved.
<b>Support for Cisco network administration control</b>	Regulatory compliance is simplified with native support for Cisco NAC.
<b>Mirror updating</b>	Mirror servers make it easy to manage distribution of signature database updates to all ESET products within the network, saving you valuable time and band width.

# ESET Smart Security 4 Business Edition + ESET Remote Administrator

## KEY FEATURES - ESET Remote Administrator

<b>Multiple database support</b>	Native support for Oracle, MS-SQL Server, MySQL and Microsoft Access allows increasingly large deployments and runs significantly faster.
<b>Policy management</b>	Define and enforce policies consistently throughout your network. Policy Manager makes it easy to apply, inherit and merge policies in a variety of ways. Time-saving replication policies allow multiple ESET Remote Administrator servers to synchronise efficiently in wide area network deployments.
<b>Notification management</b>	Notifications are highly customisable and allow for monitoring of a broad range of incidents and status of clients, possible virus outbreak or network attack, new client event, finished task, license expiration or server errors and warnings. Notification actions include email, SNMP Trap, launch on server and log entry.
<b>License management</b>	Easily manage multiple licenses with different terms. Even merge licenses of different customers through a special license key. License Manager makes monitoring unused clients and pending license expiration from one console a snap.
<b>Read only access</b>	Now it is easy to delegate or share management responsibilities of large deployments without risk of multiple administrators overwriting critical configurations.
<b>Active directory synchronisation</b>	Eliminate the time-intensive and error-prone task of creating groups by importing organisational structures directly from Active Directory.

## SYSTEM REQUIREMENTS

### ESET Smart Security 4 – Business Edition

<b>Processors supported</b>	Intel or AMD x86 - x64
<b>Operating systems</b>	Microsoft Windows 7, Microsoft Windows Vista, Microsoft Windows XP, Microsoft Windows 2000, Microsoft Windows Server 2008, Windows Server 2003, Microsoft Windows Server 2000
<b>Memory</b>	48 MB
<b>Disk space</b>	32 MB (download) / 46MB (installation)
<b>Active directory synchronisation</b>	Eliminate the time-intensive and error-prone task of creating groups by importing organisational structures directly from Active Directory.

### ESET Remote Administrator Console

<b>Operating systems</b>	Microsoft Windows 7, Windows Vista, Microsoft Windows XP, Microsoft Windows 2000, Windows Server 2008, Microsoft Windows Server 2003
<b>Internet explorer</b>	Minimum 4.0 recommended 5.5. Some reports may not display correctly in version 4.0

### ESET Remote Administrator Server

<b>Operating systems</b>	Microsoft Windows NT4 SP6, Microsoft Windows 2000, Microsoft Windows XP, Microsoft Windows Vista, Microsoft Windows 7, Microsoft Windows Server 2003, Microsoft Windows Server 2008, Windows NT4 - Access Components (MDAC) 2.5 Service Pack 3 must be installed
<b>Example requirements</b>	ESET Remote Administrator has minimal system requirements. For example, ESET Remote Administrator Server installed on a Microsoft Windows Server 2003 administering 500 clients only requires: 1GHz Processor, 1 GB RAM, 2 GB free disk space, 100 Mbps Network Adapter
